Description

The Akyga® **AK11BK** case is a product of the Akyga® Micro Tower cases, dedicated to users who want to build a compact computer. Small forms of computers are becoming more and more popular because they occupy little space and do not create the impression of "cluttering" - whether in office or at home. The elegant, black design makes it no longer necessary to hide the computer between the shelves, making it possible to match the casing to the room's design.
The casing allows the use of one of three different types of motherboards: **Micro ATX**, **Mini ITX** and **Flex ATX**. The **5.25" external bay** at the top allow the installation of a CD/DVD drive. Inside the case there are **two 2.5” and two 3.5" bays** for drives installation. The **cable management system** and customized cutouts make it easy to install components and the spacious interior allows for up to **350 mm** long graphics cards. For better cooling there is an option to install up to **three fans.** The maximum height of CPU cooling system is **160 mm**.
The front panel contains a **USB 3.0 port** for fast data transfer and **two standard USB 2.0 ports** for connecting peripherals such as mouse or keyboard. The headphone and microphone inputs are located right next to. On the side of the front panel features is located a **built-in SD/MMC and TransFlash memory card reader**.
A set of assembly screws included. The contents of the set may vary depending on the delivery.
To protect the environment, all Akyga cases are packed in **Ecobox**.
