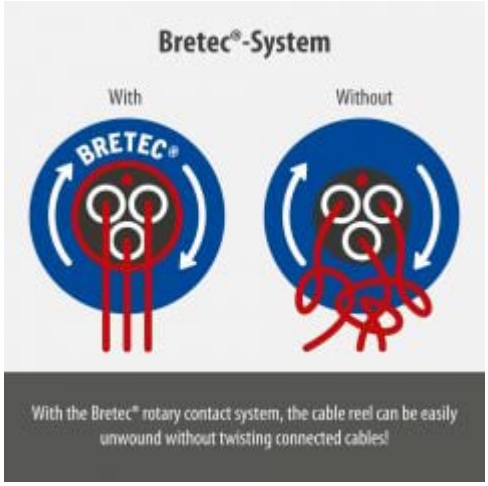
Model: **AK-CR-07**

| | |
|---|---|
| Product code | AK-CR-07 |
| Maximum power | Coiled: 1300 W, Uncoiled: 3300 W |
| IP Rating | IP44 |
| OCP | Yes |
| OTP | Yes |
| Cable length | 25 m |
| Wire construction | H07RN-F 3G2.5 |
| Socket type | 4x CEE 7/5 Female connector |
| Number of sockets | 4 pcs |
| Product color | Black |
| Color insets | Blue |
| Reel diameter | 290 mm |
| Product size (L x W x H) | 400 x 215 x 330 mm |
| Net weight | 6.99 kg |
| CE compatibility | Yes |
| EAN code | 4007123286805 |
| Warranty | 24 months |
| Manufacturer | Brennenstuhl |



# Desctription

**The Bretec Brennenstuhl Akyga® AK-CR-07 extension cable reel** features a modern, robust design that ensures not only reliability but also long-lasting use. Thanks to its extremely stable base made of steel tubes, the product guarantees optimum stability, even in difficult outdoor conditions. This design makes the extension cord the ideal choice for both domestic and professional work.

## Ergonomic Handle and Convenient Cable Management

**The cable reel** is equipped with an extremely **durable** carrying handle, which makes it easy to transport and use the extension cable in various locations. The comfortable **cable management**, thanks to the design of the handle, allows the cable to be quickly unwound and retracted without tangling. A solution that significantly increases working comfort, especially in dynamic conditions.

## Durable Cable Reel with Reinforcements

The cable reel casing is made of a special plastic with reinforcing ribs, which increases its resistance to mechanical damage. The robust construction of the body makes the extension cable reel resistant to intensive use, while ensuring lightness and portability.

## Bretec System – Safe Retraction Without Twisting the Cable

The Brennenstuhl Akyga® AK-CR-07 cable reel is equipped with the innovative **Bretec system**, which effectively stabilises the reel casing, preventing it from rotating during cable retraction and unwinding. This prevents cables connected to the reel from twisting, which not only extends the life of the cable, but also ensures comfortable and safe use. The Bretec system minimises the risk of cable tangling, which is particularly useful in intensive working conditions, increasing the comfort and precision of operations.

## Water Protection and Safe Use

The extension cord has **4 earthed sockets** with splash-proof **IP44 protection**. The sockets are equipped with self-closing protective covers to protect against moisture and dirt. This makes the extension cord ideal for outdoor use, even in adverse weather conditions.

## Overheat Protection

The safe use of the Bretec Brennenstuhl Akyga® AK-CR-07 extension cable is enhanced by the built-in **overheating protection**. In the event of an overload or excessive temperature rise, a warning light informs the user of the risk and the system automatically disconnects the power supply to prevent damage to the device and possible hazards.

## High-Quality Rubber-Neoprene Cable

The extension cable is made of rubber-neoprene, which ensures maximum flexibility and resistance to mechanical damage. What's more, the reel cable has a **length of 25 metres**, this reel is ideal for large areas, making it a versatile solution for use in gardens, on construction sites, and beyond.

# Extension Cable Reel – Power and Versatility

The AK-CR-07 extension cable reel offers two power settings: in a coiled state, it supports loads up to **1,300 watts** and when fully extended, the maximum load is up to **3,300 watts**. This makes it an extremely versatile device that will work well for both lighter jobs and more demanding power tools.

# Outdoor Use – IP44

With an **IP44 rating**, the Brennenstuhl Akyga® AK-CR-07 grounded extension cord is fully splash and dust proof, allowing it to be used safely outdoors, even in harsh weather conditions. It is the ideal choice for those looking for a reliable outdoor solution.
