Description

Case Akyga® **AK37BK** is a product of Akyga's Micro Tower offer, dedicated for users who want to create a compact computer. Small PC computer forms are becoming more and more popular because they take up little space and don't create the impression of "cluttered" room - whether in the office or at home.
The case is suitable for four motherboard types - **ATX**, **Micro ATX**, **Mini ITX** and **Flex ATX**. Placed in upper part **two external 5.25" bays** allows for CD/DVD drive or card reader installation. For internal drives there are **three 3.5" bays**, **one 2.5" bay** and **two 5.25" bays**. The applied cable management system and specially adapted holes inside the case make installation of the components fast and easy. The spacious interior holds graphic cards up to **365 mm** long. To improve the ventilation there is a place for installing **2 fans**. Maximum CPU cooler height is **155 mm**.
On the front there is a panel equipped with **USB 3.0** port for very fast data transfer and one **USB 2.0** port. Headphones and microphone outputs are placed right next to, providing quick access for connecting peripherals.
A set of assembly screws included. The contents of the set may vary depending on the delivery.
To protect the environment, all Akyga's cases are packed in Ecobox.
