| RoHS compatibility | Yes |
| REACH compatibility | Yes |
| EAN code | 5901720131638 |
| Warranty | 24 months |

# Description

Akyga® AK-CA-25 is a LCD panel designed for installation in **5.25" bay**, which is a great accessory for every computer case. It allows for manual or automatic, smooth adjustment of fan speed in the range from 5 to 100%. Manual speed control mode allows advanced users to have full control over the cooling intensity of computer components and adapt it to current needs. The detailed LCD display shows the current speed level and the temperature at the location of the heat sensor. The panel is equipped with an alarm system warning against excessive temperature rise - just determine the limit temperature level and the module will inform when it is exceeded.
The 30 cm long cable allows free arrangement of wires inside.
