Fan

Model: **AW-8A-BK**

Product code	AW-8A-BK
Product type	Fan
Supply voltage	12 V
Power consumption	< 0.1 A
Power supply connector	Molex/3-pin
Fan size	80 mm
Maximum noise level	25 dB
Cable length	30 cm
Material	ABS
Product color	Black
MTBF	30000 h
Package	UniBag
Product size (L x W x H)	80 x 80 x 25 mm
Package size (L x W x H)	180 x 130 x 27 mm
Net weight	59 g
Gross weight	64.5 g
CE compatibility	Yes
RoHS compatibility	Yes
REACH compatibility	Yes
EAN code	5901720131058
Warranty	24 months

Description

The Akyga® AW-8A-BK is a small and powerful **fan for desktop PCs**. Its diameter is **8 cm**, which makes it ideal for smaller mini and media PC cases. The fan is distinguished by its long **30 cm cable**, which makes it considerably easier to install in various configurations while providing freedom in the choice of installation location.
The AW-8A-BK **chassis fan is speed controllable**, allowing you to adapt the cooling to your individual needs and the current operating conditions of your computer. What's more, control is achieved by changing the fan's supply voltage. Thus, whether you are playing games, working or simply browsing the internet, you have full control over the cooling.
The AW-8A-BK computer fan is characterised by extremely **quiet operation** at a maximum of 25 dB. This translates into greater working comfort, especially in environments that require focus and silence. With an operating speed of 2,000 rpm and an airflow of 37 m^3/h, the fan guarantees **efficient cooling** of the computer components. On the other hand, the seven-blade design ensures optimal airflow.
The PC case fan AW-8A-BK has a **MOLEX / 3-pin** connector, making it compatible with most available motherboards and power supplies. It can be seamlessly integrated into an existing cooling system. It is easy to install, making replacing or adding additional cooling a simple operation. Mounting screws are not included with the fan.
