| Warranty | 24 months |

# Description

High-quality power cable **Akyga® AK-PC-06T**, with a length of **3 m**. Dedicated for ATX and ITX power supplies and so for any others compatible with **IEC C13** plug.
The distinguishing feature of this cable is **TINEN** plug that is equipped with a special button which pushes the plug out of the socket gently. Thanks to that, anyone can now easily remove the plug from the socket using one hand only and without the use of force. The Tinen plug type is an improvement, which helps to eliminate the difficulties with pulling out the plug and a problem of wall outlets loosening, and thus increases the safety and parts lifespan.
The cord is made of **oxygen-free copper** (OFC) in **99.99%**, which ensures long-term durability of the product without losing its properties. A **three-meter long** cord will help in case of restricted access to a power source.
